

# My Love Affair with the Brain

THE LIFE & SCIENCE OF  
DR. MARIAN DIAMOND

Scientist  
Teacher  
Role Model

“... a must see for every student, teacher, parent, community member, and higher education teacher prep program!”

—PEGGY BROOKINS, President and CEO,  
National Board for Professional Teaching Standards

**“... a powerful tool to encourage scientific literacy and spreading this role model for women and girls in STEM.”**

—American Association for the Advancement of Science

---

**THIS FILM AND SCREENING KIT** are useful tools for STEM education in schools, from middle school through 12th grade, for college, and for teacher professional development.

---

### **ABOUT DR. DIAMOND**

- One of the founders of modern neuroscience
- The first to study Albert Einstein’s brain
- Nearly two million views of her Anatomy Lecture series on YouTube, making it the 5th most popular college course in the world.
- Groundbreaking research on brain plasticity and enrichment, concepts now taken for granted and deeply integrated into pedagogy, child-care, senior-care and individual brain capacity, health and well-being.
- Beloved professor and teacher, 60 year career teaching and inspiring an estimated 60,000 students

### **ABOUT THE FILM**

- Six Film Festival Awards for “Best Documentary” and “Best Film Overall”
- Made by five-time Emmy nominated Luna Productions
- 57 minutes, close captioned
- Screening Kit includes discussion guides and resource links

### **SOME TEACHING USES**

- Intro to the Scientific Method
  - Anatomy, Biology, Neuroscience
  - History of science: scientific paradigms
  - Gender studies: women in science
  - Teacher professional development
  - Your Brain and you: plasticity, enrichment and impoverishment
- 

**“Brilliant, buoyant, enlightening and beautiful film.”**

—JOYCE CAROL OATES, Author

**“Marian Diamond has made two major contributions to Neural Science that have stood the test of time..... Bravo!”**

—ERIC R. KANDEL M.D. Nobel Prize Recipient

**“Reveals the soul of science through the remarkable life of Marian Diamond.”**

—R. DOUGLAS FIELDS, Neuroscientist and Author

**“a feel good firsthand account of the neuroscience icon’s life and work.”**

—SCIENCE Magazine
